**Problem Statement:** 1515 - Smart and Effective real-time Management of street parking by the Ministry of Housing and Urban Affairs

**Team Leader's name:** Sahil Lodhe

**Dear Team Code Gladiators,**

I am writing this testimonial to express my strong endorsement and admiration for the innovative idea presented by Team Code Gladiators, presented to me personally.

As a Regional Transport Officer (RTO), Pune, I had the privilege of evaluating proposals of Innovative ideas presented to effectively address traffic issues through street parking management through intelligent real time system.

I was particularly impressed by how well your team did survey and tried to understand public and challenges being faced by traffic police. I appreciate your discussions with Additional Commissioner of Pune Municipal corporation for recommendations.

Your rational reasons explaining why existing parking management systems are not effective and sustainable due to lack of technological solutions for vendors, unavailability of real-time information of parking availability for vehicle owners and dynamic pricing were impressive.

Your idea not only showcased a deep understanding of the problem but also offered a practical and scalable solution that can bring about significant positive change in our current traffic and parking management system.

Your team's dedication to finding innovative solutions is commendable, and I am excited about the possibilities that lies ahead.

Sincerely,

**Mr. Sanjeev Bhor,  
Regional Transport Officer,  
Pune, MH  
Govt of Maharashtra**
